

Merging team administrators from previous seasons with new teams in Whole Game System leagues

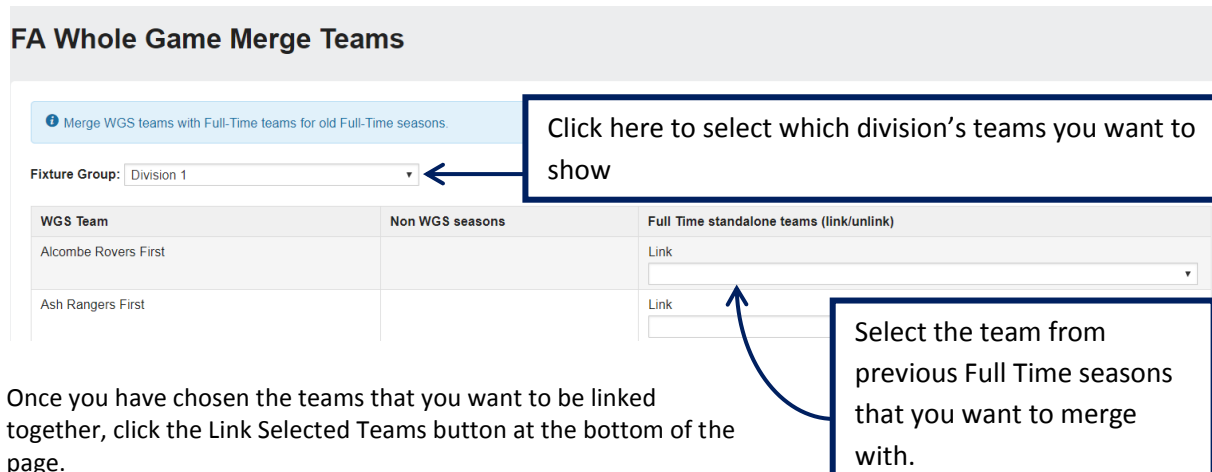

As teams are recreated as new when league information is being pulled across from Whole Game System for the 2017/18 season, they will not initially be linked with their team administrators from last season.

Rather than having to add all of your team admins again, you can merge clubs from last season and this season together, linking your team admins to the new clubs that have been created.

You can do this by going to **Setup > Teams** and clicking the blue **Merge Teams (WGS)** button.

From here, you can filter between each of your 2017-18 divisions. You will then be given a list of all the teams that have been added to your league through the link between Whole Game and Full Time. Next to each team, select the team from last season that it needs to be merged with.

Once you have chosen the teams that you want to be linked together, click the Link Selected Teams button at the bottom of the page.
